A. Hosting & Infrastructure

- **Description:** This cost covers the online space (server) where your system resides, ensuring your website and application are accessible to customers 24/7. It includes server hosting, database services (for your MongoDB), and network infrastructure to deliver your system efficiently. This server package is designed to host three distinct applications: your **client app (frontend)**, your **server app (backend)**, and your **admin app**.

- **Cost Options:**

  - **Monthly: $30.99 per month** (approximately **17,400 XAF per month**)

  - **Annually (with discount): $350.99 per year** (approximately **197,000 XAF per year**) *(Note: Paying annually offers a discount of approximately $20.89 compared to monthly payments.)*

B. Domain Name

- **Description:** Your domain name is your unique web address, such as **afcalinktravel.com**. This fee covers the annual registration of your chosen web address.

- **Cost: $27.99 per year** (approximately **15,700 XAF per year**)

C. Site Maintenance & Monitoring

- **Description:** This fee covers the ongoing monitoring and essential maintenance of your site. This typically includes:

  - Uptime monitoring (ensuring your site is always online)

  - Security checks and updates

  - Regular software updates for your backend environment

  - Database health checks

  - Performance monitoring

  - (Optional, depending on agreement: minor content updates, regular backups verification)

- **Cost: $8.99 per month** (approximately **5,100 XAF per month**)
